

Giving Shape to Ideas

KONICA MINOLTA

# HIGH PRODUCTIVITY AND DURABILITY

**AccurioPress**  
6136/6136P/6120

Monochrome Production Press

# The AccurioPress 6136/6136P/6120 set the standard in high-end monochrome printing

With superior image quality and reliability, the AccurioPress 6136 series will help your print business reach new levels of efficiency and profitability.

The AccurioPress 6136/6136P/6120 is redefining the way you think about monochrome printing. It simply performs, print after print, time and time again. The 6136 series combines exceptional speed and versatility with unmatched durability and reliability — delivering high quality prints in high-volume production environments.

## Exceptional quality, every print

The AccurioPress 6136 series is loaded with innovations that produce unmatched print quality, including the extremely precise LED printhead (LPH) with impressive 1,200 dpi resolution, advanced and highly stable transfer belt technology and Konica Minolta's unique enhanced screening technology that sharply boosts detailed text and screen gradation quality.

## Ultra precise front-to-back registration adjustment

Operator-controllable image rotation and skew adjustment for high-precision front-to-back registration. This gives your operator ultimate control of business cards, event tickets, student meal passes and other registration-sensitive applications.

## Redefines high volume for higher productivity

With the capability for three PF-710 high capacity paper feed units, the 6136 series can be configured to reach a maximum of 18,000 sheets of continuous paper supply. Up to three high capacity stackers can support a maximum paper stack capacity of 15,000 sheets. That's what we call high volume.

AccurioPress 6136/6136P/6120 offers one of the most aggressive monthly duty cycle ratings in the digital production print industry, backed by the name you've come to trust: Konica Minolta.

## High-Speed, flexible scanning convenience

The high-speed dual colour scanner has a maximum scanning speed of 240 ipm at 300 dpi duplex scanning, with enhanced Open API and IWS applications support. This provides powerful support to accommodate a wide array of legacy document sources and workflows for data archiving in schools, government agencies, law firms and more.

## IQ-501 Intelligent Quality Optimiser for accuracy and real-time correction

For the first time in a monochrome digital press, the AccurioPress 6136 series has the option of IQ-501. Imagine automated density and front-to-back registration adjustments regardless of operator skill level. Picture constant, closed-loop correction on every page, measured and managed automatically, in real time, by your digital press. And now experience how simply it works, at the touch of a button.

### How the IQ-501 will drive results for your business

- Tightly controlled density and registration
- Minimal adjustment time
- Minimised paper waste and associated costs
- Minimal manual intervention
- Minimised need for service with automated, autonomous self-correction, increasing uptime

### How IQ-501 Works

The IQ-501 uses a spectrophotometer/camera combination to examine each sheet in real time, and using a closed-loop feedback system, continually measures and transmits density, fidelity and registration information to the engine. Corrections are then made on the fly, ensuring that every print is of the highest quality with the least amount of labor intervention.

## At a glance

### AccurioPress 6136/6136P/6120

- LED print head (LPH) with impressive 1,200 dpi resolution
- Optional Intelligent Quality Optimiser for automatic density and registration control
- Media weights up to 350 gsm
- Industry-leading array of finishing options
- Real-time curl correction
- High-speed dual colour scanner
- Large capacity paper and stacking capability
- Superior print capacity with up to 3.24 M duty cycle

# High-quality monochrome printing power to perform

The AccurioPress 6136 series is built to perform in high-volume environments.

## Superior operability

A large 15-inch touch panel makes operating the 6136 series simple, allowing for greater visibility and operability. Advanced job management support simplifies output work and reduces labor costs.

## Paper profiles

Paper size, air suction feeding control and media types can be specified in each paper tray. Default optimum process settings can be selected instantaneously, allowing efficient paper setups with each job for up to 256 media profiles.

## Improved operational efficiency through job ticket / page editing

The 6136 series enables your operator to view and edit job tickets, create previews and print sample output to confirm results. The result is complex and fine-scaled output operations that are efficient and waste-free.

## Easy-to-use, flexible utilities

The 6136 series comes standard with Colour Centro software, the same colour management offered in our production colour solutions. Your operator can adjust tonal curves from a PC for images, text and graphics to enable optimised flexibility and outstanding, predictable results in image quality before the first piece is printed.

## Seamless operations and flexible utilities

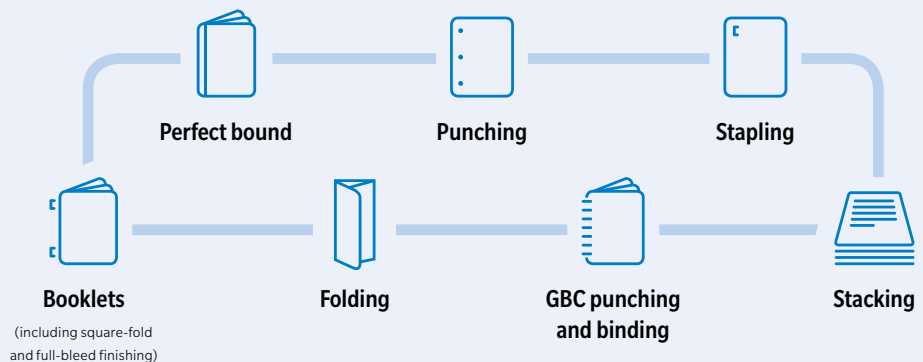

- 15-inch large touch panel with superior visibility and operability
- Simple paper catalogue settings
- AccurioPro Print Manager, an easy-to-use interface accessed from a web browser, provides functions equivalent to Job Centro on our colour production systems for job management of the printing system
- Colour Centro software is standard so you can adjust tone curves right from your desk
- Direct Print using hot folders allows drag-and-drop PDF/TIFF file to print without starting up an application

# Wide variety of finishing options expand your digitally finished output

## Finishing options

The AccurioPress 6136/6136P/6120 features an extensive variety of finishing capabilities to help you power your business:

## Choice of controllers to suit your workflow

- Konica Minolta's internal image controller was developed in-house for powerful, affordable print management. Execute end-to-end automated workflows and simplify advanced print management to expand production printing.
- In addition to the Konica Minolta controller, the AccurioPress 6136 series will soon be compatible with both Fiery and Creo image controllers. Users currently using an EFI or Creo image controller can introduce the new controller without having to change their current workflow.

## Built for your business

Professional print providers and central reprographic departments, including the specialised needs of law firms, financial institutions and non-profit organisations, will appreciate Konica Minolta's state-of-the-art monochrome production press. It delivers ultimate productivity and high versatility for media handling as well as entry-level and professional finishing. Smooth integration into industry-standard workflows ensures the AccurioPress 6136 series will meet the needs of your customers.

## Designed for our planet

Protecting the planet has always been a top priority at Konica Minolta. Our broad array of environmental initiatives will help you realise your own sustainability goals:

### Planet Ark

This program provides cost-free recycling for all our consumables, including toner cartridges and bottles. This service enables clients to arrange pick up and recycling of their used toner bottles, that will be used to create recycled products reducing the impact on the environment.

### Sustainability

Our exclusive Simitri® HD toner formulation uses plant-based biomass material to reduce environmental impact. Our presses use recycled PC/ABS resins and bioplastics in construction. The AccurioPress series models are EPEAT-Gold Certified and achieve among the lower power consumption rate of presses in their class.

### Ecovision 2050

We're committed to a mid-century goal of reducing CO<sub>2</sub> emissions by 80% from 2005 levels, minimising greenhouse gases that may contribute to global warming. We pursue that goal every day — minimising energy consumption, cutting pollution and using recycled materials in construction.

## AccurioPro

### Solutions for maximising productivity and growing your business.

AccurioPro is a comprehensive suite of modular tools and solutions that automate labor-intensive processes to streamline workflow and maximise productivity. As industry demands continue to change and grow, AccurioPro will drive efficiencies to reduce costs, increase accuracy and productivity, while strengthening your current investments.

#### AccurioPro Connect

AccurioPro Connect provides you with the tools you need to streamline your production print workflow. This powerful application allows you to automate pre-press processes, customise complex print jobs, route files based on colour, page count, metadata, etc., connect to other AccurioPro systems, manage job ticket information and much more.

#### AccurioPro Flux

AccurioPro Flux is a powerful make-ready solution for professional print management, job editing, cluster printing and product-based job processing. It allows you to manage incoming jobs by choosing from a wide range of intelligent print functions. AccurioPro Flux optimises your print output and processing while minimising costs, reducing waste and saving time.

#### Ecology & Environment

KONICA MINOLTA copiers and multi-functional products are designed with the environment in mind.

- Energy Star
- Eco-conscious Toners
- RoHS Compliance
- Production at ISO Certified Factories
- WEEE Compliance

#### Requirements for safe use.

- Please read and follow the instruction manual to ensure safe operation.
- Only operate using appropriate power supply and voltage.
- Connecting the earth wire to an inappropriate place may cause explosion or electric shock. Please connect accordingly (Taiwan and the Philippines only).
